| | **Documento da Explicação das Variáveis (De Olho no Enade)** | |
|---|---|---|
| | **NOME** | **Explicando as Variáveis** |
| **Classe** | **Curso** | |
| Variável | id | holds the info of the course's id |
| Variável | id_ies | holds the info of the institution's id of the course |
| Variável | nome | holds the info of the course's name |
| Variável | numEstudantes | holds the info of the number of students in the course |
| Variável | numEstudantesInscritos | holds the info of the number of students enrolled in the course |
| Variável | municipio | holds the info of the course's city |
| Variável | conceitoEnade | holds the info of the course's score in the Enade |
| Variável | uf | holds the info of the course's state |
| Variável | IES | Object from the Institution Class that keeps institution's info |
| **Classe** | **Instituicao** | |
| Variável | nome | holds the info of the institution's name |
| Variável | organizacaoAcademica | holds the info of the institution's academic organization |
| Variável | tipo | holds the info of the institution's type |
| Variável | codIES | holds the info of the institution's code |
| **Classe** | **TestCurso** | |
| Variável | curso | Object from the Curso Class that is instantiated to be used in testing |
| Variável | ies | Object from the Instituicao Class that is instantiated to be used in testing |
| **Classe** | **TestInstituicao** | |
| Variável | Instituicao | Object from the Instituicao Class that is instantiated to be used in testing |
| Variável | ies | Object from the Instituicao Class that is instantiated to be used in testing |
| Variável | curso | Object from the Curso Class that is instantiated to be used in testing |
| **Classe** | **ComparacaoEstado** | |
| Variável | curso | receives the name of course |
| Variável | codCurso | receives the result of the ControllerCurso's method "buscaCodCurso" |
| Variável | controller | object from the ControllerCurso Class |
| Variável | spinnerEstado1 | a dropdown list of states |
| Variável | spinnerEstado2 | a dropdown list of states |
| Variável | estado1 | receives the value of the selected state |
| Variável | estado2 | receives the value of the selected state |
| Variável | cursoSelecionado | receives the info of the selected course from the view (search by ID) |
| Variável | list | holds a list of states by the course code |
| Variável | v | view variable that is called when a view has been clicked |
| Variável | posicao | gets the position of the selected line on database |
| Variável | id | holds the id of the container's selected item |
| Variável | comparar | button to make the comparison of the score of Enade of a specific course between two differents states |
| Variável | intent | creates a new Intent object that passes from one screen to another screen |
| Variável | savedInstanceState | saves information about each View object in the activity layout |
| Variável | activity_comparacao_estado | holds the the .xml and the graphical interface of the comparacaoEstado view |
| Variável | rootView | Hosts all other views on the same place |
| Variável | inflater | creates the correct subclass of a View given the xml element name |
| **Classe** | **ComparacaoResult** | |
| Variável | curso | receives the name of course |
| Variável | estado1 | receives the value of the selected state |
| Variável | estado2 | receives the value of the selected state |
| Variável | controller | object from the ControllerCurso Class |
| Variável | codCurso | receives the result of the ControllerCurso's method "buscaCodCurso" |
| Variável | activity_comparacao_result | holds the the .xml and the graphical interface of the comparacaoResult view |
| Variável | savedInstanceState | saves information about each View object in the activity layout |
| Variável | titulo | receives the info of the title from the view (search by ID) |
| Variável | list | holds a list of averages by course code and the states |
| Variável | list1String | contains the value of the index 0 of the list |
| Variável | list2String | contains the value of the index 1 of the list |
| Variável | points | Stores the average graphic's information |
| Variável | d | contains the average information of the estado1 |
| Variável | d2 | contains the average information of the estado2 |
| Variável | g | show the graphic of average |
| Variável | inflater | creates the correct subclass of a View given the xml element name. |
| Variável | id | holds the id of the container's selected item |
| Variável | container | inflate a new view hierarchy from the specified xml resource. |
